## Richard Bach Visits ERAU

By John Dolwick

Richard Bach, author of *Jonathan Livingston Seagull*, came to Embry-Riddle Tuesday, Mr. Bach had a busy day which included a luncheon, a dialogue with the student body and dinner at the President's Residence.

While speaking to the student body Mr. Bach commented, "I have never talked to a group that knew what an aileron was. This could be a great experience. During the talk which lasted from 3:30 to after 7:00, Richard Bach answered many questions from the students. He told of his time with the Air Force, his days of barnstorming through the Midwest, how he was inspired by a vision to write *Jonathan Livingston Seagull*, and a host of other interesting experiences. He passed

on to the students his own philosophy of "Find what you want to do, do it, and watch your life change from it." Mr. Bach was on hand to autograph copies of his books.

After leaving the Air Force in 1959 Richard held a variety of jobs ranging from a mail carrier, technical writer, and editor of *Flying* magazine. He was at one time the director of the Antique Aircraft Association and editor of its magazine. In addition to writing five books, he has sold many articles to aviation oriented magazines such as *Flying*, *Private Pilot*, and *Air Progress*.

Richard Bach said of Embry-Riddle, "I haven't seen much of it, but from what I've seen this could be an incredible, fantastic place to have fun with aviation."

EMBRY-RIDDLE AERONAUTICAL UNIVERSITY

Volume 18 Number 9

Daytona Beach, Florida

FRIDAY, NOVEMBER 15, 1974

## SGA PLANS THANKSGIVING DINNER and DANCE

The last big gathering of the trimester will be a Thanksgiving dinner and dance November 22 and 23. Dinner will be served from 6:45 PM to 8:00 PM both nights. There will be three buffet lines and a free bottle of dinner wine on each table. For all Embry-Riddle students that paid an activity fee, dinner will be FREE. Each guest will be charged \$3.00 which is only to cover the cost of the food.

We're trying something new this trimester. There will be a rock band on Friday, November 22, and a country western band on Saturday, November 23rd. The band Friday, "Southern Comfort," does a rock-n-roll revival and top 40 music. The band Saturday does Johnny Cash, Lynn Anderson type of music. Each dance will run from 8:00 PM to 12:00 midnight.

There will also be a FREE babysitting service at the hotel, and a small game room.

Each student must make reservations at the SGA office. Call 252-5561, ext 26 or come by the Administration Building. We need to know the number of people for dinner, the night you will attend, and the number of children for the babysitting service. Reservations must be in by November 19th. If you reserve a space on Friday you can not change your mind,

after the 19th, and come Saturday or visa versa. Nor can any student come both nights.

Students will now be required to show ID and register their guest (maximum of three) and the student will be responsible for the conduct of their guests.

This is an inconvenience, but due to the handful of immature students that will invariably turn up at an event this large, it is necessary.

Drinks will be \$1.00 and beer 50 cents. Absolutely no bottles will be permitted in the building or on the premises. This would be illegal from the standpoint of the hotel and would jeopardize their liquor license. I think it is a small price to pay for the atmosphere. This will also help control those that don't know when they have had enough to drink. The pool area will be available for those who would like to take a breather or just sit outside and chat. Also the Hotel is right on the beach.

A few words of warning for those that can't act their age. You will be escorted from the dance immediately. It is too bad that the conduct of a few may ruin the night for all. So the first time someone tries to push someone else in the pool or gets too loud outside and disturbs the guests upstairs the pool area will be closed off. Dress will be coat-and-tie for gentlemen and appropriate dress for the ladies.

Social Functions will give away twenty frozen turkeys as door prizes.

I hope you plan to attend. Please make reservations early because we can not except more than 400 each night.

## SCHOLARSHIPS GRANTED

By John Dolwick

Two ERAU students have been chosen to receive the John I. Stack Memorial Scholarship. The recipients are Erik West and James Green.

The Stack Scholarship is awarded to students enrolled in the Aeronautical Engineering program. Several qualifications must be met before the scholarships are granted. First, each person must have completed his sophomore year. Second, the student must have spent one trimester at Embry-Riddle prior to being accepted. Most important, the selectee must have maintained a 3.2 grade point average during the trimester thereafter.

ERIK WEST

JAMES GREEN

Erik West was born in Finland and his present home is in New Park, Pa. Erik has a GPA of 3.6 and plans to graduate in April of '75. He is looking for a job in the aircraft industry when he completes his schooling.

Jim Green is from Ypsilanti, Michigan. Jim has a GPA of 3.7 and will be graduating in the spring of '75 term. Upon graduation, he plans to work at the NASA Langley Research Center in Virginia. Mr. Green was a co-op student at the Research Center.

Recipients for the Stack Scholarship are made whenever the school is given the money for them. The award will be ordinarily given to a student at the amount of \$750 for each of the last two trimesters prior to graduation.

King Tut? A German soldier waiting for the December invasion of Normandy? No, it's a Daytona Beach life guard enjoying the recent Florida weather.

## THREE JOIN RIDDLE'S STAFF

Ralph D. Henry, Vero Beach, has been named to the newly created post of Director of Development at Embry-Riddle Aeronautical University. A veteran of more than fifteen years in the field, he will be directly responsible to the President in matters of development and public relations and in alumni matters and parent relations.

Working with Henry will be John R. Rollins as Director of Community, Alumni and Parent Relations and Mrs. Dorothy G. Lewis as Public Relations Director. Both are filling positions that have been vacant for the past year.

Henry's appointment was effective October 15th and was announced to the Board of Trustees by ERAU President Jack Hunt on October 18th.

The new Director of Development is a graduate of BA Hamline University in St. Paul, Minnesota and did graduate work in educational psychology at the University of Minnesota.

He served as Director of Development at New College in Sarasota from 1956 to 1971 and before that was with Albion College, Albion, Michigan and Hamline University. For the

past four years, he has been in business in Worthington, Ohio.

He and his wife, Ione, have a daughter, Lee Anne, and a son, Rex, both college students.

In introducing Henry to the Trustees, General William W. Spruance, the Chairman said:

"After months of searching, we have found a development officer who has had meaningful experience, has a great personality and has expressed a desire to really get involved with development at Embry-Riddle."

Rollins is an alumnus of Embry-Riddle with a Bachelor of Science Degree in Aviation Management. He also holds a degree in business administration from Babson College, Wellesley, Massachusetts, and majored in public relations at Boston University. Rollins has been an admissions counselor at ERAU since January.

A native of Maine, Rollins served as an Army pilot for five years after leaving Boston University, seeing duty in Vietnam and Europe.

As a student at ERAU, he was an assistant in the Humanities and Social Science Division

STORY CONTINUED PAGE 4

## Circle K Comes To ERAU

The local chapter of Kiwanis International is interested in sponsoring a Circle K club on campus. Circle K International is the largest collegiate organization in North America, with nearly 700 clubs throughout the United States and Canada.

Circle K is a service organization through which college men can find a means of responsible student action in their communities and a more active involvement in the life of their campus. Their concerns result in very direct personal service. They are involved in nuts and bolts activities that help people and serve the campus and community as clubs perceive needs they can effectively meet.

Circle K is a practical laboratory for the development of personal leadership skills and the growth of personal initiative in analyzing the needs of our en-

vironment and attempting to find solutions for them.

Circle K is a means of forming friendships, working in a common cause with other students, and simply having fun. Social functions are important for a well rounded club. Parties and other purely social club events are recommended, and the weekly meetings are designed to be education and interesting. College is more than scholarship—it's a good time. It's getting to know others; it's finding out who you are; it's trying to make a meaningful contribution to a world that wants to wait. Circle K provides a unique opportunity for reaching each of these goals.

Any student interested in forming a new service organization on campus should contact Mrs. Lamar.

## SGA Passes New

### Bil For Senate Appointments

By John Dolwick

The Student Government Association has just voted in a new bill which allows interested students to fill vacant seats in the Senate. The new bill reads:

"If a student Senate position is vacant for any reason, any eligible student can petition for the Senate seat, with confirmation of the Senate, for the remainder of the trimester. After which he must be elected to that Senate seat."

A student may petition by submitting a letter to the SGA

Vice-President, stating why that student would like the seat. The letter should also give a background of the student including his eligibility to hold the Senate post. Eligibility requirements can be found in the SGA by-laws. Vice-President Stan Bartlett stated, "the purpose of this bill is to keep a full Senate. During the trimester some members of the Senate will leave or be discharged for one reason or another." Currently there is one position open in Aviation Maintenance Management, and one position vacant for an A&P.

## OPINION

The opinions expressed in this paper are not necessarily those of the university nor all members of the student body. Letters appearing in The Avion do not necessarily reflect the opinions of this newspaper or its staff.

## Editorial

### NOW'S A GOOD TIME . . .

The season's right and the situation is demanding action. The situation is the "moat" . . . ditch . . . channel . . . whatever that is that "surrounds" dorm I.

Before everyone screams "Daytona" and starts pointing toward the city hall, take a minute to ponder the situation. I'll be the first to admit that I don't know the relationship between the city, ERAU and the sewer department. I do know that the moat is becoming more and more unsightly and is an unhealthy detraction from the appearance of the dorm. It doesn't lend much to impressing prospective students either. So let's clean it up.

The cans, trash, weeds, and etc., that float in the moat can be removed without too much difficulty and a rake and a pair of clippers could clean out the banks to some degree of respectability. I imagine the city could come up with some chemicals to kill anything growing in or on the water if asked. The big question, who comes up with the elbow grease, I don't know! The University has the tools, trucks and etc., Perhaps they'll come up with the leadership to get the project off the ground. I'll bet there are students in the dorm willing to help.

### SHOE LEATHER EXPRESS

On the subject of guys in the dorm, it will come as no surprise to most that a great deal of the dorm residents have no means of transportation save the "shoe leather express." Recently I've noticed increasing numbers of dorm dwellers walking from the dorm to the student center and being passed up by car after car with ER stickers on them. How bout it—let's give the guys a ride if we can. I'm sure each and everyone of them will be most appreciative.

### POLICIES

I've never seen so many policies surfacing lately. As normal, the student body becomes more and more active each tri and more and more policies arise from the depth of the great policy book. "Don't we have a policy against Non-Vets; how about raffish; What about the policies regarding this 'n that."

Why the heck don't we publish the policies. Or if that's not a good idea—just suggest to me how the students are to find out what the policies are.

I have seen a letter addressed to Thomas Hunt indicating appreciation by the Red Cross for the 180 people who volunteered to give blood at our last Blood Drive. Attached to the letter is a listing of all of the people, blood types, etc. A quick compilation shows that 11% of the student body contributed, 10% of the staff (administration), and only 5% of the faculty.

We have three blood drives each year. The requirement for annual coverage is that 25% of the organization participate. It

seems fairly obvious that the people who have the longest contracts will do the least to hold up their end of our blood bank. It also appears that if everyone who does contribute would take a friend with them, we could build our bank to a long term position that would help cover our alumni and those who cannot give. While the SGA sponsors the Blood Drive, it appears too that a little better organization is needed by the faculty.

(name withheld)

"You know, Ethyl, 68 thermostat degrees somehow don't seem as warm as 68 air conditioner degrees."

## Libel Suit Dismissed Against Student Paper

CPS—An irate apartment manager who filed a \$1 million libel suit against the Ohio State Lantern and the Columbus Tenants Union (TU) has been ordered to pay \$9000 in damages to a former Lantern staff member as a result of a countersuit filed against him by the student.

The apartment owner filed a complaint last March charging that reports in the Lantern and TU's newsletter concerning a dispute with one of his former tenants "conspired to ruin (his) reputation," and that the two groups were "circulating libelous and defamatory matter which was malicious and designed to injure (his) reputation and standing in the community."

Complaints against the Lantern were dismissed last spring based on a summary judgement. One of the Lantern staffers then filed for malicious prosecution damages against the landlord and won. The decision involving that part of the suit filed against TU is still pending.

### NOTICES

**STUDENTS:** If you will be here over the Thanksgiving Holiday and would like to share dinner with a local family, please contact Mrs. Lamar, ext. 73.

**FACULTY & STAFF:** Will you invite a student to Thanksgiving dinner? Please contact Mrs. Lamar.

There are two positions open for any experienced photographers who would be willing to work on the 1975 Phoenix. If interested contact Willie Thornton at 252-9378, Room 312 at the dorm or call 252-5561, ext. 73.

The Navy Recruiting Team will show two films—"Pressure Point" and "No Points for Second Place"—on Friday evening at 7 PM in Room A-108.

"Pressure Point" is a film about flight training candidates and "No Points for Second Place" is about the F14 and "dog fighting."

## PRESIDENT'S CORNER

By Andy Dyndul

Last week the Senate held another meeting and we passed some very worthwhile legislation. I'd like to bring your attention to some of the bills passed that may be of interest to you.

The Senate has established new guidelines for "goodwill." If any student is hospitalized, he may receive one of the following:

1. Flowers
2. Free TV rental for one week
3. Receive up to \$12 for books, magazines or any other reading material

Also in the event of a student's death or the death of a student's spouse, child or parent, flowers will be sent to the funeral.

The Senate passed another bill as addition to the By-Laws. The bill, in effect, allows students to petition for Senator positions if there are any vacant seats after an election.

Two newly formed organizations were recognized by the Senate. The organizations are the Embury-Riddle Eagle Band and the Brothers of the Wind. The Non-Vet's Club was tabled until the next Senate meeting pending a more specific purpose for the club.

I hope some of you are noticing the Senators by their new name tags, which they should be wearing. These Senators will work even harder if you're behind them. Don't just support your Senators. I'm asking you to DEMAND the best possible representation you can get.

To bring you up to date on the Physics "affair," I'm preparing a number of proposals to be presented to the next session of the Academic Standards and Policies Committee. I'll keep you informed of any progress or set backs.

My second project, that I'm involved in, is in the Maintenance Technology area. The problem is A&P students are being charged an extra \$50 per development course the school requires them to take. I feel this extra \$50 or \$100 is unfair to the A&P students. I'm in the process of obtaining background information necessary to make some proposals.

'Till next week, let's all get together for a strong and unified campus.

Andy

## Special Accounting I Class Offered

A "special" Accounting I section (MS 110-01) that uses a new concept in class presentation will be offered during the spring term.

The classroom environment should be interesting to students since one traditional lecture session will be replaced each week by a professionally produced audio visual program known as ALEX (A Learning Experience). ALEX has been created by the Prentice-Hall Publishing Company after years of research and preparation and is considered to be one of the best visual aid presentations that has been developed for beginning accounting students. In addition, specially prepared exercises will supplement the ALEX program to assure a close correlation between the film presentations and the text material.

Classes will meet three sessions each week. ALEX and supplemental exercises will be used in one session. Two sessions will be conducted in the traditional manner and will include review and discussion of specific problems the students may encounter.

Text material requirements will be the same as those used in other MS 110 sections.

Accounting Principles, working papers Chapters 1-14 and Practice Set 1 by Niswonger and Fess.

Computers and the Accounting Process by Robert F. Meigs.

The MS 110-01 (special) will be offered Monday-Wednesday-Fridays at 11:00-11:50. Mr. Judson Stryker will be the course instructor.

Anyone who is interested in applying for a student assistant position or wanting additional information about the course may contact Mr. Stryker on ext 27 or at his office C-426.

## NOTICE

To the person who took the two wallets and the calculator from room 257. I guess by now you have enjoyed some or all of my \$41. It only took me two weeks of work to earn it. Enjoy the money, but what are you going to do with the wallets and I.D.? Instead of throwing them away, why don't you put it in box 1163. My name, as you probably know by now, is David Kasser. My roommate would also like his wallet, and calculator if you can manage it.

## ERAU Instructor Explores Transcendental Meditation

By William Sheldon

In a recent interview, Mike Deeley, an instructor with the Math Department, was approached about his involvement in Transcendental Meditation (TM). Mr. Deeley stated that at the outset, he was very skeptical about TM but tried it anyway. He attended the introductory lecture and was assigned a teacher. Mr. Deeley was given his Mantra. This mantra is a Sanskrit word that the mediator learns to silently repeat in an effortless way. Every person has a mantra, but nobody knows the other persons' mantra. The mantra is selected for him by his teacher according to his age and character type. According to Mr. Deeley, one's mind is allowed to wander with the mantra during meditation. One's muscles relax and his mind and body experience a deep rest. The person looks like he is asleep, but his mind is aware of his outside sur-

roundings. Sometimes noises or daydreams distract him, but he then gently turns his mind back to the mantra.

Mr. Deeley meditates two times a day for twenty minutes usually in the morning and then in the late afternoon. If one meditates too late in the evening, he will experience difficulty in sleeping because of excess energy.

Mr. Deeley has been meditating for about fourteen months. Through meditation, Mr. Deeley has quit smoking, had fewer bad days, has more energy, feels he is more outgoing with people is more relaxed, reads faster, sleeps better, and thinks faster than he did before learning to meditate.

Mr. Deeley recommends TM for anybody who wants to make the most out of his life. TM can be learned only from a trained teacher at any local branch of the International Meditation Society.

## Management Course Offers

### New Concept In Learning

A "special" section of MS200 Principles of Management, will be offered Spring term using an innovative teaching method called the Personalized System of Instruction. This method is especially attractive to students because of its self-paced feature. This means that each student advances at his own pace throughout the course, only constrained to complete the course requirements by the end of the trimester period. This also provides the opportunity for the student to finish up before the end of the trimester too. Also of interest to students, is the close personal contact and attention they receive from the course instructor and student proctors who serve in a tutorial capacity to aid students in mastering the material covered in a unit of study.

The content of the Principles of Management course is divided into nine units of study. Progress from one unit to another is done by demonstrating mastery of unit objectives. Unit mastery tests are administered to measure achievement. When the student feels he has mastered the unit objectives he requests testing. If the test results show mastery, he advances to the next unit. If mastery was not achieved he is asked to go back, restudy the unit, and test when he is ready. The

cycle is repeated until mastery is demonstrated. Tests are graded "on-the-spot" so students know immediately the results.

For this "special" section of MS 200 a different text and reading book is used. They are: Management and Organizational Behavior by Hodge and Johnson, and Management: A Book of Readings by Koontz and O'Donnell.

The course, MS200-1 (Special) is offered Monday, Wednesday, and Friday from 9:00 to 9:50 AM. The course instructor is Mr. Philip Weatherford, Assistant Professor of Aviation Management. Mr. Weatherford has used PSI as an instructional technique before, while teaching at Florida State University, with outstanding results in terms of student acceptance and student learning achievement. Mr. Weatherford would like to talk with anyone wanting to know more about the course and those who would like to be a course proctor. He is located in C-11 Building, Room 428, Academic Complex, telephone extension 27.

Student proctors will receive three hours of MS 499 credit for their participation. Qualifications for proctors are a grade of B or better in MS 305, MS 313, or MS 316, and be a junior or senior.

## ALUMNI NEWS

GARY V. BECHTOLD, an August 1974 graduate from the Aeronautical Science program is in the US Army currently stationed at Fort Carson, Colorado.

PETER D. BEHRLE graduated with a degree in Aviation Management in April 1972. He is presently working for the New York State Department of Mental Hygiene and plans to begin graduate studies toward an MA in Hospital Administration at George Washington University in Washington, DC.

THOMAS L. BERG is serving in the US Air Force at Norton AFB, California as an aircraft commander of a C-141. He graduated with a BS in Aeronautical Science in December 1970.

RUSSELL P. BORGER earned his BS in Aviation Management in October 1962. He is currently a line mechanic with Eastern Air Lines in Ft. Lauderdale, Florida.

RICHARD C. DONEGAN graduated with a BS in Aviation Management in June 1972. He is presently a factory representative for Hexcel Corporation in Dublin, California.

RON E. FARWIG is an Aeronautical Science graduate from April 1967. He is president and reserve captain for King Air, airport and aviation consultants, located in Indianapolis, Indiana.

DWIGHT W. FORNEY received his BS in Aeronautical Science in August 1973. His present location is Richland, Washington where he is a captain with Eyewear Airlines.

ROBERT FRIEZE graduated in April 1974 with a degree in Aviation Maintenance Management and is currently associated with Fairchild Republic in Long Island, New York as an industrial engineer.

OLIVER E. GAGNE, JR. is first officer with Apollo Airways, Inc., in Detroit, Michigan. He graduated in April 1972 with a BS in Aviation Management.

JOHN A. JOHNSON is an April 1974 Maintenance Technology graduate who holds a BS and MS in Aeronautical Engineering. He is presently at the Naval Air Station at Patuxent River, Maryland and working as an aerospace logistics engineer.

KEVIN T. KELLY received his degree in Aeronautical Science in December 1973. He is an Ensign with the US Navy stationed at Corpus Christi, Texas and in the flight training program.

FRANK E. BIBBEE is the Air Force with the 6th MIL ALFT Squadron stationed at McGuire AFB in New Jersey. Frank graduated from the Aeronautical Science program in April 1970.

★★★★★★★★

Since college football players are not allowed to appear in TV commercials, the "Un-Cola" had to settle for a student manager from Notre Dame to play an "Un-person" in a commercial which is running this fall.

# Active Duty

By Frank Stookey

## 1. ENFORCER REVISITED.

An article in this column pertaining to the Cavalier/Piper Enforcer has created a great deal of interest among the active duty types on Fort Riddle. The aircraft has ten ordnance stations under the wings and a maximum gross takeoff weight of 15,500 lbs. The Enforcer can carry 5,840 lbs of ordnance, and as mentioned before, has six .50-cal. internal guns (each having a firing rate of 1,100 rounds per minute).

The Enforcer has been qualified in both daylight and night operations during USAF's Pace Coin tests for a variety of weapons that would be used in the close-support role. These include: Two flare pods, each containing 16 flares; two 1,000 lb canisters of thinned napalm; Mk. 82 general purpose and Snakeye bombs; LAU-3A 19 round rocket launcher pods; 800 lb. category cluster bomb.

The Enforcer as proposed will be powered by an Avco Corp. Lycoming Div. T55-L-9 turbine engine now in production for Iran's procurement of Boeing Vertol CH-47 Chinook Helicopters. The engine develops 2445

ehp, and weighs only 795 lbs. In comparison to the North American F-51, the Enforcer has been redesigned and uses entirely new tooling. The changes include:

- All aluminum alloy construction.
- Stretched acrylic windshield and canopy.
- Self-sealing foam-protected fuel tanks. Engine hot section is forward of all flammable liquids. No fuel is carried in the fuselage.
- Solid state avionics.

e. Zero/zero pilot extraction system.

f. Fuel system with selective sequencing, inverted standpipe, tip tank dump, jettisonable drops, empty warning lights and tanks that all use gravity feed.

g. Redundant controls. The Enforcer's turn radius at 9,100 lbs combat weight at sea level is: 800 ft at 150 kt with 2 g, 1,200 ft at 250 kt with 4.1 g, and 2,000 ft at 300 kt pulling 3.8 g. (computed with an average bank angle of 75 degrees).

Strike response for the Enforcer includes a drag index of 150 with a gross weight of

STORY FROM PAGE ONE

and associate editor of the Peg-ass, the literary publication. Rollins, a photography and sailing buff, lives at 166 South Halifax Drive, Ormond Beach with his wife, Uta.

Mrs. Lewis, a graduate of the University of Florida, was a member of the Daytona Beach News-Journal editorial staff for 22 years, working as a reporter, feature writer and news editor. She has done graduate work in education at Florida Technological University.

The new Public Relations Director lives at 429 Tarragona Way with her husband, Gordon, a design-draftsman at General Electric. Math and languages are two of her major interests and she plans to take some advanced math classes at Embury-Riddle.

CAVALIER/PIPER ENFORCER CLOSE-SUPPORT AIRCRAFT, WHICH WOULD BE PRODUCED BY LOCKHEED-GEORGIA UNDER AN OPTION, CARRIES A MIX OF WEAPONS ON ITS 10 ORDNANCE STATIONS. NOTE THE LARGE OVER-TH-WING EXHAUST PORT FOR THE AVCO LYCOMING T55-L-9 GAS TURBINE ENGINE. THE SMALL RESIDUAL THRUST EXHAUST PROVIDES A LOW INFRARED SIGNATURE FOR HEAT-SEEKING MISSILES. MUZZLES OF SIX .50-CAL. GUNS ARE BARELY VISIBLE IN THE WINGS.

13,170 lbs including 1,336 lbs of fuel and 4,100 lbs of ordnance. Responses are: 150 naut. mi. in 26 min., 100 naut. mi. in 17.4 min., and 50 naut. mi. in 9 min.

The design load factor is 8 g at 11,500 lbs and 6 g at 14,000 lbs. The wing area for the Enforcer is 252 sq. ft.

Maximum speed at 15,000 ft. with 11,000 lbs is 403 kt. Speed range begins at 78 kt. The aircraft's time of climb from sea level to 20,000 ft. at a weight of 14,000 lbs is 8.5 minutes. Rate of climb from sea level weighing 11,000 lbs is 4,792 feet per minute.

It is strongly hoped that the Army Aviation Systems Command will consent to testing the Enforcer. In some areas it even performs better than the

USAF's A-10!

2. REPLACEMENT FOR OV-1 PILOTS? Lockheed Missiles & Space Company has won the competition to supply 30 miniature remotely piloted vehicles to the Army Aviation Systems Command to enable the Army to evaluate their tactical usefulness.

The mini-RPVs will be supplied in four different avionics payload configurations for different reconnaissance/surveillance/target designation missions.

The 120 lb vehicle will be a delta-wing configuration with a 12 ft wingspan. It will be powered by a 14 hp reciprocating engine built by McCulloch Corp.

Israel is also on the verge of acquiring mini-remotely piloted vehicles (RPVs) for a variety of

military missions. The Israelis will order RPV equipment from at least three (and possibly as many as five) US manufacturers. During the 1973 war, Arab forces wasted large numbers of surface-to-air missiles by mistaking unarmed target drone decoys for Israeli aircraft.

3. AIR FORCE RIF! Air Force personnel officials say another officer RIF is inevitable while contingency plans for an enlisted strength cut also are being drafted.

An early November board is going to screen the records of thousands of reserve officers in preparation for the expected RIF. While no figures have been given for the size of the officer group to be separated early, it is expected to number between 1,000 and 1,250.

## New Bike Lock Guaranteed

**If anyone breaks this lock and steals your bike, we'll pay for the bike**

By Norm Whitson

Looking for a product which the manufacturer will back up with a guarantee? Well, we at Security believe we've found one.

You can order this lock retail for \$21.45 plus tax, or you can get in on a bulk order through the security office and get it at a 15% discount. Once we get 20-plus on the list, we'll send in the order.

Look at it this way. You're betting \$18.25 that someone will bust your new lock and the maker will buy you a new bike. If you have a bike worth \$100, that's approximately five to one odds. Either way—you win. You still wind up with a bike.

TON BROWN IN THE CHRISTIAN SCIENCE MONITOR  
Copyright 1974 T.G.S.P.S.

## HAPPY TRAILS

The country's first trans-American bicycle route is scheduled for completion in 1976, coinciding with the nation's bicentennial celebration. Two routes, each stretching from the Oregon coast to Washington DC will primarily use existing back roads and will skirt major cities. The 3500 mile trail is the brainchild of four cyclists who have been researching and charting the trail this summer.

Beginning in May of 1976, tours will leave daily from both coasts and a guidebook will be available. Listing repair shops and pinpointing overnight lodgings every 40 to 60 miles. The trip will take approximately 80 days for a "slow" tour (traveling 40 to 50 miles per day) and half that time for a "fast" tour.

Information may be obtained from Bike-centennial '76, PO Box 1034, Missoula, MT 59801.

## Steps Taken To Improve

### US Flag Lines

Secretary of Transportation Claude S. Brinkgar has issued the following statement regarding the future of the US flag lines:

After a full review of the situation, President Ford has concluded that it is not now fair to the Nation's taxpayers to ask them to support our US international flag air carriers with direct cash subsidy payments. The issue that prompted this review and decision is the application of Pan American World Airways to the Civil

Aeronautics Board for an emergency interim operating subsidy of \$10 million a month.

The President, in recognition of the serious financial difficulties facing Pan Am and the importance of a healthy international US flag airline system directed that a strong effort be made to improve the competitive climate in which Pan Am and our other international air carriers operate. Many positive actions are already underway, and others will be started promptly. Not all of these ac-

tions can be carried out entirely by the Administration. Most require cooperative action by others, including the CAB and, in some cases, the carriers themselves. I would like to use this occasion to assure the air carriers that the Administration will push hard to obtain this cooperative action.

The near-term action steps include:

1. **Fares More in Line With Costs.** Fare structures that more closely reflect today's costs should be soon approved by the appropriate organizations. This includes fares of the scheduled carriers and the charter carriers, including those available to the military. Although no one wants to see travel fares go higher, realistically we must recognize that as costs go up—and foreign fuel prices have tripled in the past year—the carriers must recover these in higher ticket prices.

2. **Excess Capacity.** Without question the many air carriers, including US flag carriers, that have rights to fly international routes to and from the US, are flying excessive passenger capacity relative to today's demand. Recent agreements between US carriers and the Italian and the British carriers for winter capacity reductions are an encouraging step, and we are looking for further progress in prompt agreements with the airlines of France and West Germany. In addition, the State Department has an intensive review underway, working with us and the CAB, to determine which of the foreign carriers are flying capacity to the US that exceeds the rights provided by their bilateral agreements. I have been assured that there will be prompt action to correct the excesses.

3. **Tariff Integrity.** Together with the CAB and Department of Justice, we are pushing ahead on a program to eliminate or at least reduce, illegal ticket discounting. As part of this program we are also investigating the roles of the travel agents and tour operators to determine if some form of Federal licensing is needed.

4. **Fly US Flag.** While US citizens constitute over 60% of those flying overseas to and from the US, our flag carriers carry a far smaller share. An equitable balancing of these ratios would add some \$200 million a year to revenues to US flag carriers. Together with the Department of Commerce, and, hopefully, with the cooperation of the Nation's travel agents we will push a "fly US flag" program to encourage US citizens to increase their use of US flag airlines when they travel and ship abroad.

5. **Mail Rate Increases.** We are encouraging the CAB to accelerate their actions to adjust international mail rates to reflect today's higher costs.

6. **Overseas Discrimination.** There appear to be instances where US flag carriers are being discriminated against overseas in terms of excessive landing and other fees. Together with the State Department and the CAB, we are in the process of documenting the flagrant cases. We will seek immediate corrective action.

7. **Route Restructuring and Service Suspension on Loss Operations.** We are strongly urging the carriers themselves to consider agreements on overseas route rearrangements and possibly even mergers, as well as unilateral actions to suspend service to points that have inadequate traffic potential to cover costs.

We believe that the combined impact of these seven steps—that, in many ways, are long overdue—will, in time, do a great deal to improve the financial health of all our international flag carriers, including Pan Am. In particular, we believe that these positive and prompt actions by the Administration now provide assurances to the private sector financial institutions that our international flag carriers do have a fine future, and that they deserve their continued financial support—not only in times of growth and good profits, but also in times of losses and short-term setbacks.

## Delta Chi News

By Ken Babrick

There are a lot of sore legs and blisters among many blisters, shared throughout the brotherhood of Delta Chi. This past Saturday, we all went roller skating! All of the brothers, pledges, and little sisters had a blast!

This upcoming Saturday is the Delta Chi mid-semester sush party. Those of you who were not able to pledge the brotherhood this fall, because of financial difficulties, or because you are a first semester freshman, or for personal reasons, will be extended a personal invitation this week. We would just like to let you know of our interest in you.

Delta Chi's Social Calendar for the remainder of the trimester is an exciting one—to say the least.

### NOVEMBER

16—Mid-Semester Rush Party

22—Pledge Paddle Party

28—Thanksgiving Day Dinner (sponsored by our little sisters)

30—Practice for Oldies Party

### DECEMBER

7—Oldies Party

14—Christmas Party

As you can see, Delta Chi is always active. Whether it is sponsoring a school calendar or getting "all greased up" for an oldies party, we do it together, and that is what our fraternity is all about! If this is what you are looking for, then give us a call at the fraternity house. The number is 252-9429. We're looking forward to meeting YOU.

# WASHINGTON

## MERRY-GO-ROUND

By Jack Anderson

WASHINGTON—Our White House sources tell us regretfully that President Ford is mismanaging the economy worse than former President Nixon did during the Watergate crisis. There is confusion in the White House, they say, over how to cope with economic problems.

The President is still insisting that inflation is the nation's number one problem. The measures he has adopted to fight inflation, meanwhile, are pushing the nation into a recession, and this, many economists believe, has become the number-one problem.

There is now evidence that the President got his economic wires crossed. White House insiders say his economic advisers delivered a confidential forecast to him several weeks ago that unemployment would hit 7 per cent next year. This would be a sure sign of a recession.

But their confidential prediction never reached the Economic Policy Board while it was working out the President's economic program.

This board is the nation's top economic policymaking group.

Yet its members went ahead with a plan to fight inflation unaware that the President's economic advisers, in effect, expected a recession.

Thus, an increasing number of economists believe the President is fighting the wrong economic war with the wrong weapons at the wrong time.

**WAR DRUMS:** Once again, the Middle East tinderbox is threatening to explode into flames.

The Arab nations have formally designated the Palestinian Liberation Organization as the bargaining body for all Palestinians. But the Israelis, who regard the PLO as a terrorist group, swear they won't negotiate with them. The only alternative, it appears, is war.

Already, the two sides are preparing for battle. Russia is pouring armaments into Syria. The Israelis are clamoring for rush deliveries of U.S. arms, including sophisticated missiles.

This had led intelligence analysts to believe the Israelis may even be planning a preemptive strike against the Arabs. The Israelis reportedly expect Egypt and Syria to launch long-range, ground-to-ground missiles at cities. To prevent this, they may decide to launch their missiles first.

Intelligence experts fear this would be the first step toward a nuclear exchange. As we reported several years ago, the Israelis already possess nuclear weapons. And the Egyptians have been promised a nuclear reactor from the United States.

The CIA has also picked up hints that India may provide the Syrians with a nuclear reactor. The deal was struck, according to intelligence reports, when the Indian defense minister visited Damascus in late September.

The Middle East, clearly, has become the most dangerous spot on the map.

**FORD TO QUIT?** Sources close to Gerald Ford now believe he will not try to stay in the White House after 1976.

The reasons are both personal and political. The primary reason, of course, is his wife's poor health. Betty Ford, even before her breast surgery, had been urging her husband to retire from politics.

Friends say that Ford depends heavily on his wife for political advice. He has sorely missed her view during her illness. If she now asks him to step down, he probably would do so.

The man himself may also be tiring of the fray. In the past, he has enjoyed political barnstorming. But his performance this fall was lackluster.

Privately, GOP leaders fear his bland style will also hurt Republican chances in 1976. They know him well enough to tell him about their apprehensions.

It is just possible, therefore, that Gerald Ford may be content to settle for his assured place in history: a caretaker president who saw the nation through a crisis.

**HILL REFORM:** The new Congress will be dominated by junior members who have been elected within the last six years. Even before the election, 61 senior members retired, rather than face the electorate again. Most of them were obstructionists who have helped to block reform.

Now a majority appears to favor reform. The first test will come in December when the House Democrats hold the organizing caucus. The newcomers will set up a howl for congressional reforms.

They are also talking about checking the power of the president.

There will be renewed support for a constitutional amendment that would permit Congress to remove a president in a three-fourths vote of each House.

There is even talk of establishing a ceremonial president who would attend to the formalities of the office, while a constitutional president will concentrate on governing the nation.

Some of the lessons of Watergate, it appears, may finally be adopted by the new Congress.

**WASHINGTON WHIRL:** During the last days of the Nixon administration, one irate citizen forwarded a package of dried cow dung to the White House. The package broke open at the post office and perplexed authorities wondered what to do. They decided that regulations are regulations, so they wrapped up the cow chips and dispatched them to the Executive Mansion. Because he failed to take out health insurance when he left the White House, former President Nixon will have to foot his enormous hospital bills out of his pocket. Ironically, even if his own proposal for national health insurance had been enacted, Nixon would still have had to pay at least \$1,500 of his medical costs. And, after 90 days of unemployment, he would have been without insurance...

Scores of children and some adults have been hurt while imitating Evel Knievel's jumping feats. The worst injury resulted in a death. The least serious case involved a six-year-old Chicago girl who got a bad scare when she drove her bicycle off a board and into a sandbox... Pulitzer Prize-winning correspondent George Waller has been waiting in Australia for nine months to recover a tattered notebook he lost in a scuffle. The courts awarded him his notes and 40 cents in damages, but the wait has already cost him \$5000... The federal budget squeeze has forced government officials to withdraw the support they were giving to an important Mafia informant for the testimony he gave against his syndicate comrades. He is now on welfare.

## Buck's Gun Quiz ANSWER

On Monday, 11 November, all four (4) of the entrées that were submitted to the AVION, in sealed envelopes for the Gun Quiz, sponsored by Buck's Gun Rack on Volusia Avenue, were taken to Bucks for judging by Buck himself. One source of reference used by Buck to identify the weapon, was the *Small Arms of the World: A Basic Manual of Military Small Arms* by W. H. B. Smith, Copyright 1960 by the Stackpole Company, Sixth Edition (Library of Congress Catalog Card Number 60-6827). The answer to the Gun Quiz questions of: manufacturer, model and caliber of the rifle donated by Mr. Buckwald to the NRA Museum can be found on page 384 of the book. The present curator of the National Rifleman's Association Museum and Mr. Buckwald both agree that the following information is authentic and pertains to the weapon in the quiz:

Manufacturer: French, Saint Etienne, Fusil

Model: M1907/15

Caliber: 8MM, Lebel rimmed cartridge

Additional information on this weapon is: overall length-51.42 inches; barrel length-31.4 inches; weight-8.38 pounds. In 1934 the 1907/15 design was modified to handle the 7.5 MM rimless cartridge, the magazine was changed from the old Mannlicher type to a 5-shot Mauser type, also the barrel was shortened to 22.62 inches.

Buck regrets to inform the participants in the Gun Quiz that there was not a winner. A few people were close, but not exact as required. Buck, in conjunction with the AVION, is presently working out details on another contest that should interest more Embury-Riddle students. Keep a sharp eye out for future details and contest rules in the AVION.

## Sigma Chi Fraternity

Ten members of the Sigma Chi Pledge Class were sent to the Volusia County Juvenile Detention Home last Saturday. Once behind bars, the group provided a party for the youths at the Home.

The Pledge Class is required to conduct a community service project. With the help of Detention Home employee Gary Zambito, the class arranged a cookout and organized sports.

After a slight delay (one of the guards misplaced the keys) the Pledge Class was released. The project was a great success with both the juveniles and the pledges having a really good time.

On November 9th, the Sigma Chi's Fall Pledge Class completed their community project. The Pledge Class held a field day and bar-b-que for the adolescence at the Juvenile Delinquents Home in Daytona Beach.

The Pledge Class held a car wash at the Shell Station at the Sunshine Mall on Saturday, November 10th.

This coming Friday all are cordially invited to the Happy Hour from 5:00-9:00 PM at the Sigma Chi Chapter House on 520 South Ridgewood Avenue.

# SPORT PARACHUTE CLUB EVENTS

By Dave Grieger

On a beautiful sunshiny Sunday afternoon, sixteen skydivers exited a DC-3 from 18500 feet at Deland Airport to fabricate a "Sixteen Man Star." Doug Benson (with 50 jumps) from Embury-Riddle fell as base man. Bill Murray, a veteran with over 500 jumps, immediately pinned Doug and formed a "Two-Man Base," on which several others entered. Carl Wilson professionally flew in sixth. Several seconds and skydivers later, Dave Grieger completed a "Fourteen Man Star," with two more persons entering when the "break" altitude was reached. Everyone then bogged off and pulled their ripcords.

This jump earned Doug and Carl their SCR (Star Crest Recipient) for participating in an eight man or larger star. Dave earned his SCS (Star Crest Solo Award) for "flying" in eighth or later. Living up to skydiving customs, all three bought their case of Michelob for accomplishing their great feat and a great time was had by all. Truly a memorable sky dive!

On Sunday, 3 November, Jack Corder performed his second 30-second free fall delayed sky-

dive which he executed perfectly; thus completing the student training and progression sequence. Jack, now a "veteran" with 17 jumps, is eagerly looking forward to next Saturday morning when he will perform his first skydive from the big DC-3!

This last Sunday cute and petite Sandy (all 80 lbs dripping wet) made her first parachute jump. Jumpmastered and trained by Andy Reyling, Sandy exited a C-182 from 2800 feet at Deland Airport. According to Andy, "Sandy did a dynamite job and performed the feat flawlessly." This included above average canopy control and a perfect parachute landing fall.

Sandy is not the only Riddle chick skydiving. Linda Mayberry, and Sue Oldroyd have made static line jumps. Sue Gunner made her first free fall jump a few weeks ago.

The Embury-Riddle skydivers invite anyone who wishes to participate, watch, or help out to go to Deland Municipal Airport on Saturdays and Sundays and support the ERAU Sport Parachute Club. Bring your camera! You'll find lots of excitement and friendly people.

# ERAU SPORTS

The ERAU skydivers would like to remind everyone that the National Collegiate Parachute League will have their annual sky diving competition from 28th of November to the first of December.

Presently it appears that Embury-Riddle will be represented at the meet by five ERAU skydivers. Be looking for a future article that will explain the meet in detail. Over fifty colleges from all over the US are expected to participate in the various parachuting events.

## The Giant Killer Takes To The Diamond

Another week of untouchable fall Eagle baseball has transpired. May 1 first fill you in as to who has been keeping the Expo fields warm for the last two weeks. The Canadian Nationals have graced the county park in preparation for their attack to take the world olympic baseball gold medal to the very north. The team consists of an all star compilation of Canadian born college players. Somehow the screaming Eagles was, shall we say "granted" the opportunity to scrimmage the French speakers last Saturday. Needless to say, our little fooling around this fall was not intended to meet such auspicious opponents. Matter of fact we probably won't see talent such as this for the whole 1975 season. Everybody sobered up for Thursday practice and ole "Iron Man" went strong till dark. By Saturday noon the fellows were beginning to feel that their arms had grown another 34 inches.

At 1:15 the giant killers met some real dragons. Interestingly enough at the end of four big ones the score was 3-5, theirs. From there on it was theirs a

couple of more times. But it was extremely comforting to see our guys, both rookies and vets, connecting on some good pitching, making good defensive plays, and in some innings pitching shut outs. Considering that it'll be six weeks into the spring tri when we start our steamroller this "light" scrimmage will have some definite learning benefits. Our caps are off to coach Wayne Norton, the Canadian scouts and their allstars.

And so the big diamonders ended another week with memories of "Iron Man" up a notch and the very northern dragons.

PS-For those of you who will be with us in the spring, it would be wise for you to come out for a half hour and take 30 swings off "Iron Man". He's going strong 3:30 till dark Monday and Thursday and from 11:00 to 2:00 Saturdays. Please take advantage, soccer and football are over but we're just beginning. Incidentally, everybody who made it last Saturday, even if it was the individuals first time out saw some action against the Nationals.

## Soaring

The Embury-Riddle Soaring Association has found a new home. Ifland Airport has worked out a deal for our soaring operation. The thermals are one hundred percent better than what we found around Ormond Beach Airport. Gary Rice, the Deland Airport manager, and everyone at the airport has welcomed us warmly.

We've had a lot of people coming out to Deland for demonstration rides and information about joining our club. For those interested we are lo-

cated to the west of the Airport Restaurant (the side towards Deland). Our flights are continuous from 10 AM to 3 PM each weekend. Come on out and join the fun. There is a lot happening at Deland Airport that the whole family could enjoy, such as the Sport Parachute Club, experimental gyrocopters, and all types of sport aircraft. Sign-up for a demo flight by calling Carl Chapman at 252-2954, or Bill Batesole at 253-9268 in dorm room 244.

## Foilers Host FIFA Tournament

By Jack Sprankle

This coming weekend Embury-Riddle fencers will host their first FIFA, Florida Intercollegiate Fencing Association, Tournament. Battles will begin on Saturday at 9:00 AM and continue throughout the day in the Daytona Beach Community College gym.

Several FIFA teams are expected to compete, among these will be Florida State, Brevard

Community College, Miami-Dade Community College, University of South Florida, and Florida International University.

Events will begin with men's foil, women's foil, women's epee and individual epee. Later that afternoon the four weapon teams will battle.

Everyone is invited to attend and cheer the Eagles to a victory.

The next meeting of the Dive Club will be Monday, November 18th at 5 PM in room A102. Final plans will be made then for the trip to the Blue Grotto.

## Girl Of The Week

RAFFLES ARE CONSIDERED ILLEGAL LOTTERIES UNDER STATE LAW, AND MAY NOT BE HELD ON CAMPUS. PRIOR PERMISSION IS REQUIRED FOR ANY SELLING OF WARES, INCLUDING ADMISSION TICKETS, ON CAMPUS. AUTHORIZATION MAY BE OBTAINED THROUGH THE ACTIVITIES OFFICE.

# SGA CONSTITUTION

## Section 6 Authority and Powers

The Senate shall:

- Have the sole power of impeachment.
- Have the power to enact such legislation as it deems necessary and proper to fulfill the needs of the student body.
- Have the power to override a presidential veto by a two-thirds vote.

## Section 7 Legislation

The right to initiate legislation shall be limited to the Senate, the President, and the student initiative petitioners.

## Section 8 Impeachment

Any member of the Senate may initiate impeachment proceedings. Any appointed or elected official of the SGA may be removed from office by a three-quarters (3/4) vote of the total Senate membership. Voting privileges of the defendant shall be suspended during the proceedings. The reason for initiation must be submitted in writing to the Senate and the concerned official at least fourteen (14) days before proceedings commence.

## Section 9 Quorum

Fifty-one (51) percent of the current Senate membership must be present to conduct official business. Should a quorum fail to exist during the course of business, the presiding officer shall rule to table all pending legislation until the next regular meeting or special meeting and adjourn the present meeting.

## Section 10 Special Meetings

In an emergency, fifty-one (51) percent of the current Senate membership may call a special meeting of the Senate for a specific purpose. The purpose must be in writing, signed by the members calling the meeting, and submitted to the Secretary for recording. The Secretary shall be responsible for providing a written notice to all Senators and the student body.

## Section 11 Regular Meetings

Regular meetings of the Senate shall be as stated in the By-Laws. All meetings of the Senate are open to the entire University community.

## Section 12 Veto

All legislation enacted by the Senate is subject to acceptance and possible veto by the President. Such vetoed legislation must be returned to the Senate at its next meeting following the enactment or at a special meeting if called for that purpose.

## Section 13 Term of Office

The term of office shall extend for a period of one year and expire upon the installation of the newly-elected Senators.

## ARTICLE V

### THE JUDICIAL BRANCH

## Section 1 The judicial power of the Student Government of Embry-Riddle Aeronautical University shall be vested in a Student Court, herein referred to as the "Court."

## Section 2 Representation

The Court shall consist of seven justices elected at large from the student body. Once elected, a justice shall hold office for the duration of his enrollment at ERAU, unless graduated, impeached, or dismissed from the University.

## Section 3 Qualifications:

- Must be and remain a full-time student during the term of office.
- Must have attended ERAU at least one full trimester prior to being appointed to the office.
- Must not be on academic or disciplinary probation and must remain off probation during the term of office.
- Must have at least two consecutive trimesters remaining when being appointed to the office.
- Should be exemplary students in all respects and preferably a junior or senior.

## Puerto Rico Plans Demonstrations

The first Puerto Rican tragedy occurred in 1508 when Juan Ponce de Leon and his soldiers invaded the island to pacify the already peaceful natives.

The second and continuing tragedy began in 1898 when at the end of the Spanish-American War Puerto Rico became an official colony of the United States after 400 years of Spanish domination.

Since then the island has been elevated to the status of a commonwealth. Its people are non-represented US citizens but subject to all US laws, and have been conscripted to fight in World War II, the Korean and Vietnam wars. The once idyllic island is a haven for heavy American industry, which according to Puerto Rican nationalists, is seriously threatening water and air pollution standards and exploiting the underpaid workers.

Eighty percent of the Puerto Rican economy, nationalists again say, is now controlled by US multi-national corporations. Twenty-four US-owned chain stores in Puerto Rico are responsible for 90% of all retail sales.

In an effort to bring the Puerto Rican situation to the American public the Puerto Rican Solidarity Day Committee has organized a demonstration in Madison Square Garden October 27, under the banner "Bi-Centennial Without Colonies."

Diverse liberation groups in the US have rallied behind the demonstration and appearances have been promised by Angela Davis, Dave Dellinger, Jane Fonda, and Pete Seeger among others. The demonstration received a boost recently when four leading members of the Congressional Black Caucus—Louis Stokes (D-OH), John Conyers (D-MI), William Clay (D-MO) and Yvonne Burke (D-CA) joined the list of public figures who have announced their support for the rally.

### VIOLENT HISTORY

Recent Puerto Rican history has been spotted with violent demonstrations and numerous strikes all related to the independence issue.

In 1950 a six day nationalist insurrection resulted in hundreds of deaths and thousands of arrests. Following the uprising two Puerto Rican nationalists went to the Blair House where President Truman was living and tried to shoot their way into his room. As a result of the attack one of the nationalists and a guard was killed and the other nationalist was arrested and sentenced to life imprisonment.

Four years later on March 1, 1954, four nationalists entered the House of Representatives and began to randomly fire pistols, crying "Viva Puerto Rico Libre!" The four men were sentenced to long prison terms and it is in their honor that the October demonstration is being dedicated.

Since then various student and worker strikes have been waged to protest US rule on the island. Heavy opposition has been voiced recently against a proposed Puerto Rican "Superport"—a deep-sea port that has the necessary off-shore depth to dock huge tankers, used primarily to transport oil. It is a project that all the states on the eastern coast of the US have rejected for ecological reasons.

Trip agents and charter flight operators around the country predict that the Christmas transportation queue this year will be greater than ever before.

May student charter flights to Newark were reportedly filled by the end of September, an exceptional early start compared to previous years. The discontinuation of airline youth fares has boosted the charter flight popularity but even full-fare airline flights are already nearly completely booked into major cities during the peak period of December 1-22, travel agents report.

## \$1500-\$2500 cash bonus for one of these jobs.

Not everyone can get the jobs listed below. You must qualify for them. But, if you do, and successfully complete your training, you'll be paid a cash bonus.

The bonuses range from \$1500-\$2500, depending on the job. You'll be expected to serve a 4-year enlistment. But the bonus will be paid in a lump sum after your training. And most of the jobs are open to women.

In addition to the bonus, you'll also receive regular Army pay and benefits. A starting salary of \$326.10 a month before deductions, with a raise to \$393.90 in just four months. Plus meals, housing, medical and dental care, and 30 days paid vacation every year.

Here are some of the jobs:

- Construction Machinery Operator
- Missile Crewman
- Missile Repairman
- Electronic Repairman
- Electrical Instrument Repairman
- Radio Teletype Operator
- Map Draftsman
- Radar Crewman
- Radio Mechanic
- Electronic Technician
- Telephone Repairman
- Tank Mechanic
- Electrical Plant Operator
- Inventory Clerk

**Mice Paradise**

CPS—With Christmas just a little more than one month away, it's about time to start thinking about what to buy that certain someone who has everything.

Naturally these are people who spend all their time just thinking up things to sell to people who have everything. And this year the top item on the list is just ideal for your naturalist friends—a mouse ranch.

The ranch is a 12-foot square plastic extravaganza that comes completely equipped with everything but the mice. For \$3500, the ranch comes with its own little building, watering tanks, feed bins, fencing, a windmill, and silver-plated "roundup tweezers."

The "paradise for mice" is built by Neiman-Marcus of Texas for anyone who has "ever dreamed of becoming a cattle baron" but presumably never had the time. It's just the thing if you're looking for a range war with your neighborhood ant farmer.

By Barbara Lyons

Landrum & Brown Airport Consultants, Cincinnati, Ohio, will be on campus November 19th and 20th to interview possible candidates for their staff in Cincinnati. They are seeking professional personnel with a sincere interest in aviation planning. Reference literature will be on file prior to then. If you plan to interview, please have a resume prepared. Sign up in the Placement Office for an appointment.

The US Navy will be on campus November 15th and 16th giving helicopter rides. If you are interested please come to the Placement Office and complete a Flight Waiver Form and establish an appointment.

The US Marine Officer Selection Team will be on campus in the Student Center on Monday, November 25th. Captain Thomas is the liaison officer, stationed in Jacksonville.

The following job information has been received in the Placement Office during the past week. If you desire additional information or if you want to apply, please stop by at your earliest convenience.

Airframe & Powerplant technicians in Saudi Arabia with C-130 and/or T-56 experience.

Students or alumni for immediate openings in Europe as maintenance instructors. Practical or teaching experience required.

Industrial Safety Representative for State of Florida.

Flight Instructors and Charter Pilots in Collingwood, Ontario.

Flight Instructors in St. Petersburg, Florida. Immediate need.

Various employment opportunities with Honeywell, Inc.

Pilot for corporation in Fairmont, West Virginia.

Airframe and Powerplant technicians needed in Hayti, Missouri.

Airframe and Powerplant technicians needed in New Orleans.

The part-time employment business is really slow in the local area at the present time. Help your fellow students out—forward part-time information to the Placement Office.

## Management Seminar At Riddle

By Willie Thornton

Mr. Douglas Wolfe, Airport Manager of the Daytona Beach Regional Airport, put a background light upon the various aspects of management.

Mr. Wolfe, who once filled the position of manager of the Teterboro, New Jersey area, states that every airport should be self supporting. This is due mainly to the fact that the average citizen considers the airport a luxury asset and as a result increases taxes. This increase in taxes just deepens the airport dilemma.

Mr. Wolfe went on to add that "the future of aviation is a bright one, but one has to have experience." The Coop program is an important factor behind getting the experience. The local program is sponsored by Embury-Riddle and Daytona Beach Regional Airport. Three students have been accepted as interns. They are paid a salary based on a forty-hour work week. They also receive six credit hours. The students still must pay regular trimester fees.

Mr. Wolfe discussed many aspects of the aviation profession. Generally Mr. Wolfe emphasized all subjects related to business administration.

His main advice, given to all who seek such a profession is this: "Got to search, got to look, but don't stop."

ACTIVITIES OFFICE

**VOLUNTEERS NEEDED:** PLEASE NOTIFY THE ACTIVITIES OFFICE IF YOU CAN TUTOR, OFFER A LONELY STUDENT THANKSGIVING DINNER, PLAY SPORTS WITH BOYS, INVOLVE YOURSELF IN WORTHWHILE COMMUNITY SERVICES IN ANY WAY.

FOR FURTHER INFORMATION SEE MRS. LAMAR, BLDG. 3, OR EXT. 73.

### LANCASTER AIRPORT AUTHORITY

P.O. BOX 9166 NEFFSVILLE, PA. 17601

November 5, 1979

Barbara Abbe Lyons  
Placement Officer  
Embry-Riddle Aeronautical University  
P. O. Box 411  
Daytona Beach, Florida 32215

Dear Mrs. Lyons:

On May 29, 1979, you sent me a listing for the position of Assistant Airport Manager in Lancaster, Pennsylvania. I applied and was subsequently hired for this position.

I would like to thank you for taking the trouble to send the information. Without your efforts, there is a good possibility that I would still be unemployed.

Again, thank you, and if I can ever be of assistance to you, don't hesitate to contact me.

Sincerely,

## Princeton Had Goalpost Problems

In the warm minutes of the game, Rutgers led Princeton, 6-0. Exuberant Rutgers fans poured onto the field and tore down both goal posts.

But the clock still showed time left to play and the officials finally cleared the field. With just 22 seconds remaining, Princeton tied up the score with a touchdown. But with no goal posts, Princeton—and the referees—had a problem: what to do about the extra-point kick that could win the game.

Someone suggested that the kick be aimed at an imaginary goal post and let the officials judge its accuracy. Another option was to retire to a practice field and attempt the point-after. Or simply award Princeton the usually automatic extra point.

But the officials ruled that Princeton must run or pass for a two-point conversion. Princeton did, they failed, and the game ended in a 6-6 tie.

### OVERDUE BOOKS

This term has been the worst in Embury-Riddle history for overdue books. For your information, the lending period is two weeks. Books may be renewed for another two weeks if someone else has not requested it. Please return books on time. Sending overdue notices is time consuming, uses too much paper and the notices frequently lie in student's mailbox for days before it is picked up. Your cooperation will be appreciated.

Overdue fines are five cents a day on regular circulation and 25 cents an hour for reserve books. PLEASE NOTE.
